

FOR THE PRINCIPAL — PLAIN-LANGUAGE SUMMARY

What actually needs your attention *this month?*

A short, non-technical summary of how every grade and subject is doing — so you know what to celebrate and what could use a bit more support.

We checked **24 grade-and-subject groups** this month — every grade, in every subject. **Most of them are doing well.** A handful stood out as worth a closer look, so we've pulled those into this report: **1** could use action right away, **2** are worth a look this week, and **2** are just worth keeping in the back of your mind. The remaining **19** groups are doing great — nothing needed there.

THIS IS THE ACTUAL GRID YOUR TEAM SEES — EACH SQUARE IS ONE GRADE + ONE SUBJECT

HOW TO READ THIS REPORT

- Needs action now — your students would benefit from some support here. Worth stepping in this week.
- Look this week — not urgent, just worth a quick look while it's still small and easy to shape.
- Keep an eye on — nothing to do yet. We're just keeping you in the loop.
- All good — no action needed. Great news, nothing unusual this month.

Monthly Priority Report — March 2026

The 5 things worth your attention, explained simply

Ordered from most to least urgent. Each one includes what we suggest doing about it — small, manageable steps, not big fixes.

NEEDS ACTION NOW

Grade 9 · Science

14 students in Grade 9 saw a sharp dip in Science scores this month — the clearest opportunity to step in early.

Suggested next step: Worth a look first — checking what changed in how the topic was taught this month should point to a quick fix.

LOOK THIS WEEK

Grade 7 · Math

Grade 7 Math students are feeling more confident than their scores currently show — a gap that's grown a little this month.

Suggested next step: Show students their actual score next to how well they thought they did — this usually closes the gap on its own.

LOOK THIS WEEK

Grade 8 · English

6 students in Grade 8 English are skipping questions they're actually capable of answering — likely a confidence thing, not a skills gap.

Suggested next step: A short, encouraging conversation with them should help — this is usually about confidence, not ability.

KEEP AN EYE ON

Grade 10 · English

Grade 10 English students are leaning a bit more on AI tools than on their own reasoning when answering.

Suggested next step: Nothing needed yet — we're simply keeping an eye on it in case it becomes a habit worth addressing.

KEEP AN EYE ON

Grade 6 · Social Studies

Grade 6 Social Studies classes have started a little late three sessions in a row.

Suggested next step: Likely just a scheduling hiccup — a quick check with the coordinator should sort it out.

"Two things could use your attention this week — everything else on the grid is in good shape."
